Field Details

myVal

```
private int myVal
```

Instance variable for card value

mySuit

```
private String mySuit
```

Instance variable for card suit

Constructor Details

CardGjidoda

```
public CardGjidoda()
```

null constructor

CardGjidoda

```
public CardGjidoda(int newVal,  
                   String newSuit)
```

default constructor

Parameters:

`newVal` - incoming value

`newSuit` - incoming suit

Method Details

setSuit

```
public void setSuit(String newSuit)
```

method that sets new card suit

Parameters:

newSuit - new incoming card suit

setCardVal

```
public void setCardVal(int newCardVal)
```

method that sets new card value

Parameters:

newCardVal - new incoming card value

getSuit

```
public String getSuit()
```

method that returns card suit

Returns:

card suit

getCardVal

```
public int getCardVal()
```

method that returns card value

Returns:

card value
